

Primitive Reflex Training for Chiropractors and Therapists

2 Day Training Course

Are you interested in learning more about the primitive and postural reflexes, their role in development and the impact they have on movement and learning?

Are you a qualified chiropractor or therapist with a thirst to know more, why not join us on this two day training.

Objectives of the training days:

- Explore and understand the role of the primitive and postural reflexes in early development and neurological maturation.
- More detailed exploration of key reflexes, their developmental process and the impact on learning.
- Sharing of and learning ways to work with the reflexes to help children build skills, naturally.

Training Day:
